# Edible Oils and Fats

Edible oil is basically a fatty acid liquid which has been extracted from several vegetables as well as from animal tissues. Edible oils need to be refined before entering into market for consumption. South Asian cuisine uses a large variety of edible vegetable oils, fats and spices. Middle East and South Europe also use locally grown olive oil for cooking.

## Key Parameters We Test

- Nutritional parameters
  - Proximate parameters
  - Melamine
  - Aflatoxins (G1, G2, B1 and B2)
  - Heavy Metals (including Copper, Iron, Zinc)
  - Pesticide Residues
  - Additives
  - Adulteration tests
  - Fatty Acid Profile
  - Cholesterol
  - Residual Hexane
  - Vitamins
  - Safrole (NOTS)
  - Omega 3, 6 and 9
  - Minerals
- ✓ NABL Accredited Lab
  - ✓ Accurate & Reliable Results
  - ✓ Advanced Testing Equipment
  - ✓ Fast Turnaround Time
  - ✓ Expert Technical Team
  - ✓ Compliance with FSSAI & BIS Standards
