YOUR TRUST OUR ASSURANCE.**

## MEAT & MEAT PRODUCTS TESTING

Meat speciation and traceability concerns are gaining global attention due to fraud cases involving cultural and religious sensitivities. Recent adulteration incidents in India and abroad have triggered stricter regulations, heavier penalties, and increased scrutiny of food safety systems, with a strong focus on accurate species identification and residue monitoring.

## Eggs & Egg Products

Eggs are a complete high-protein food, containing all nine essential amino acids. They are rich in high-quality protein, vitamins, minerals, riboflavin, selenium, healthy fats, and trace nutrients—most of which are concentrated in the yolk.

### Our Testing Services

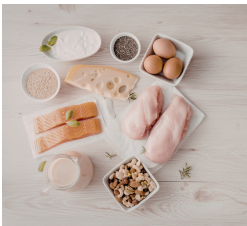

#### Meat & Meat Products

##### MICROBIOLOGY ANALYSIS

- Total Bacterial Count (Aerobic Plate Count)
- Coliform
- Escherichia coli (E. coli)
- Listeria monocytogenes
- Salmonella
- Staphylococcus aureus
- Yeast & Mould
- Sulphite Reducing Clostridia

##### CHEMICAL ANALYSIS

- Nutritional Parameters
- Proximate Parameters
- Additives
- Pesticide Residues
- Safrole (NOTS)
- Melamine
- Heavy Metals
- Minerals

#### Egg and Egg Product

- Listeria monocytogenes
- Enterobacteriaceae
- Salmonella
- Aerobic Microbial Count
