ORGANIC PRODUCTS TESTING

Organic foods are products cultivated through organic farming practices, prioritizing natural and sustainable agricultural methods while minimizing synthetic chemicals, pesticides, and GMOs

Organic processed foods avoid artificial additives and preservatives, opting for natural alternatives. Sustainable farming practices, including crop rotation and reduced water usage, minimize environmental impact and promote biodiversity

We provide advanced and accurate testing solutions for organic food products to ensure compliance with national and international standards.

Organic Product Testing Includes

TESTING METHOD

- Chemical Residue Analysis
- Microbiological Testing
- Nutritional Analysis
- Adulteration Check
- Allergen Testing
- Heavy Metals Testing
- Environmental Impact Assessment
- Organic Certification
- Quality Control Testing

CHEMICAL ANALYSIS

- Pesticide Residues
- Safrole (NOTS)
- Melamine
- Heavy Metals
- Aflatoxins
